Panorama merge	Ctrl + M

A, X, O and Shift + O apply with Crop active.
Mac merge commands use Control, not Command.

READ THE KEYS

+ means press the keys together.
Context matters: select the right module / tool.
Ctrl = Control; Alt = the Alt key.

BUILD YOUR WORKFLOW

G to browse. P / X to cull. D to edit.
R to crop. Shift + W for masks.
Ctrl + Shift + E to export the result.

KEEP EDITS FLEXIBLE

Use virtual copies for alternate treatments.
Copy only the settings you want to reuse.
Export creates a new rendered photo file.
